

SVATOBOR 2025

- Rules for participants –

General Information:

The festival will take place on Saturday 14.6.2025 in the valley of the Oslava River below Nová Ves. There will be signs along the way. Ideally arrive on Friday afternoon. Departure of participants from the event during Sunday morning.

After arrival and camping, it is necessary to immediately re-park the car in the parking lot reserved for participants. We do not want to go around the camp again on Saturday morning and investigate whose car is parked at the historic camp.

Camping

Each group will be assigned a campsite upon arrival. We ask that participants do not set up more than one campfire per group and that the campfire site be restored to its original condition prior to departure (return sod).

- Organizational matters before the event should be addressed with Jakub Kozák via email: kuba@sigurd.cz

- Contact person on site is Jirka Krmela 606 080 532 and Boros 724 705 161

Dressing of participants

During Saturday from the morning hours in costume. We believe that each group can keep this in order.

Armament and equipment for battle and competition disciplines

A metal helmet and hand protection with weapon is required for all combat activities. Throwing and firearms are not allowed. Blunt weapons, without distinctive teeth on the blades. Weapons will be inspected prior to combat.

Maximum length of danax is 1.5m, maximum length of spear is 2.5m - spear is held by upper grip with both hands. The combination of a long weapon and a shield slung over the stomach and back is forbidden in combat.

Hitting areas (blue is for axes, swords and danaxes, red is for spears) and handling of weapon

Sword, axe, danax: hands from wrists up, legs from knees up, torso, head except neck and face.

Spear: arms from elbow up, legs from knees up, torso to chest. In no case is the spear attacked above the chest, nor are attacks above this line indicated. The spear is not for cutting. **Swinging the spear in front of the opponent's face will result in disqualification of the fighter, both in battle and in bridges.**

The attack is to be conducted with such force that it is noticed by the person hit, but not so as to injure him. The hitter decides the validity of the hit - we assume fair play. If you feel that your opponent is "not falling" so do not shout at him in front of civilians, but charge him more.

GPS: 49.1165878N, 16.3052986E

We look forward to seeing you!
